### COURSE INFORMATION

This course is presented year-round and is designed to impart the basics of plant production for easy and practical implementation. This course will help you to apply basic plant production skills to your farm to ensure that your venture is as profitable as possible. It will help the new and existing farmer to attain a high level of success in production. You will spend a day visiting a working farm, the remaining two days will consist of theory, including completing a workbook.

This course focuses on generic plant production.
